Milton Keynes University Hospital NHS Foundation Trust

FOI 1707 - Drug Overdoses	
Question	Comments
The figures for the number of hospital admissions from knife wounds since 1st April 2019 till 31st August 2021.	Included below are the number of admissions to Milton Keynes Hospital between 1st April 2019 to 31st August 2021 where the patient was coded with a clinical code for a drug overdose in the first episode of their admission. The data has been split by sex, age banding and ethnicity. Please note: The clinical codes used to identify a drug overdose are listed in a separate tab. These include both accidental and intentional drug overdoses. Clinical coding is currently complete up until the end of August, so any patients that were discharged after this time may not be included, as coding may not yet be completed for their admission.
