### FOI - 7616 - Patients with Immune Thrombocytopenia (ITP)

Questions	Notes/Comments	Response	
		Total Number of Unique Patients	Total Number of Inpatient Spells
In the last 6 months (or the latest 6 months data you have available), how many patients has your trust treated for immune thrombocytopenia (ITP)?	<p>Detailed are the number of inpatients discharged from MKUH between the <b>1st January 2022</b> and the <b>30th June 2022</b>, who were assigned the ICD-10 code 'D693: Idiopathic thrombocytopenic purpura' as a primary diagnosis. Provided are the number of unique inpatients, and the total number of inpatient spells (this will include patients who had more than one inpatient spell meeting the criteria).</p> <p>Please note:            - Although the assumption is that if a patient has a primary diagnosis of 'Idiopathic thrombocytopenic purpura', they are in hospital to be treated for this condition, we cannot provide assurance that this is the case.            - Inpatients data has been provided as outpatient attendances are not clinically coded and there were <b>0 patients</b> who attended MKUH ED Department between the <b>1st January 2022</b> and the <b>30th June 2022</b> with a snomed diagnosis code of '32273002: Idiopathic thrombocytopenic purpura' assigned to their attendance.</p>	8	13
