### **Request under Freedom of Information Act 2000**

Thank you for your request for information which we received on 12 January 2018.

I am pleased to confirm the following.

### **Within your trust how many patients have been treated, in the past 6 months July to December 2017 by diagnosed eye condition.**

Please see table below the sum of the diagnosis split does not sum to the total – this is because there are two patients who have had both diagnoses and therefore appear once in each category.. Note that as we do not record diagnosis against outpatient attendances, the figures below only include patients admitted to MKUH as an inpatient, restricted to those that did not have a procedure.

### **Of these patients how many are new to treatment [they have not previously received an injection / implant]?**

The Trusts system does not record how many are new to treatment. To ascertain this would entail manually trawling through patient records which would require permission and exceed the appropriate time limit.

	Total Patients	New Patients	Lucentis (ranibizumab) Patients	Lucentis (ranibizumab) NEW Patients	Eylea (aflibercept) Patients	Eylea (aflibercept) NEW Patients
Total	127		105	58	72	47
Wet Age Related Macular Degeneration (wAMD)	57					
Other conditions (DMO, RVO or mCNV)	72
