### **SOP Statement**

This SOP has been designed to provide a seamless process which will facilitate initial legal process for management of confirmed fetal anomaly when a TOP has been agreed by the woman.

# **Executive Summary**

The SOP will assist Antenatal &Newborn Screening Midwives in prenatal screening to identify a doctor/doctors who will willingly agree to facilitate /participate in the initial process of termination of pregnancy (TOP), offered & agreed for clinical indications. The initial process will include completing legal forms, gaining consent from the woman and prescription of medication for termination of pregnancy. It is important to note that **EVERY EFFORT** must be made to obtain the second signature on HSA1 form on the **SAME DAY** after the first doctor signs the form. This will ensure that the process to offer TOP is expeditious and avoids unnecessary distress to the woman as a result of delay in completion of legal process.

#### 1.0 **Roles and Responsibilities**

### <u>Antenatal & Newborn Screening Midwives (ANNB):</u>

- Support the woman & her partner/family throughout the process
- Arrange an interpreter in case of language barrier
- Go through the flow chart to identify doctors who would be facilitating the initial process of TOP. This must be done on the SAME DAY after the first signature is complete on HSA1 form.
- Ensure checklist for TOP is complete (see appendix 3)

### Obstetricians:

- Obstetricians will provide support to the woman & her partner/family throughout the process of
- Gain consent from the woman
- Complete and provide two signatures for form HSA1 (Certificate A, Abortion Act 1967). This is a legal requirement and must be completed before any treatment can commence.
- Complete and sign yellow Abortion Notification form HSA4 form.
- Prescribe medications for TOP

#### 2.0 Implementation and dissemination of document

This document will be published on the Trust Intranet and will be accessible to all healthcare professionals.

#### 3.0 **Processes and procedures**

#### 3.1 Pack contents:

TOP pack contains the following forms:

- Consent form
- HSA 1 (Certificate A Abortion Act 1967)
- HSA4 (Abortion notification)
- Drug chart
- TOP checklist

#### Admission for further management following administration of Mifepristone: 3.2

All women undergoing TOP should either be admitted to Ward 21 or Labour Ward, 36 hrs after administration of Mifepristone.

Gestational age <=16 weeks – Admission & further management on Ward 21 Gestational age >16 weeks -Admission & further management on Labour Ward

#### 3.3 **TOP doctors name list:**

Milton Keynes
University Hospital
NHS Foundation Trust

This document is uncontrolled once printed. Please check on the Trust's Intranet site for the most up to date version. ©Milton Keynes University Hospital NHS Foundation Trust

This list contains names of consultants, Trust grade doctors and trainees who would be willing to facilitate the TOP process. This list will be updated regularly e.g. when junior doctors change over or new appointments of doctors are undertaken.

A list of the members of staff who are willing to participate in the legal process can be provided by the operations team.

### 3.4 Forms

HSA1 (Certificate A Abortion act 1967)-This form should be completed and signed by two doctors. This is a legal requirement and MUST be completed before any treatment can commence (see appendix 1).

HSA4 (Yellow Abortion notification form) This form must also be completed and signed – usually by the same TWO doctors completing the HSA1 form (see appendix 2).

The consent for feticide will be performed by OUH FMU Consultants.

Postmortem forms: This form is completed following the delivery of fetus. Please note, **ANY POSTMORTEM REQUESTS BEFORE 16 weeks** need to be discussed with pathologist in Oxford – contact 01865 221246.

If TOP is managed in the gynaecology ward, the postmortem form will need to be completed by doctors. In Labour Ward, either the attending midwife or doctor can complete the form.

### 3.5 Process

As soon as fetal anomaly is confirmed and TOP agreed by woman, the ANNB will follow the process below:

- Fetal anomaly confirmed at MKUH: Both signatures will be provided by MKUH consultants. The first signature on HSA1 is usually provided by the fetal medicine consultant who confirms the fetal anomaly.
- Fetal anomaly confirmed at tertiary centre: In this case, the first signature will be provided by OUH FMU consultant. MKUH consultant will provide the second signature on HSA1 form.

- If no doctors are available on that day, operations managers will provide names of the doctors for the following day.
- The woman will be contacted by ANNB midwives to attend for consenting and completion of legal paperwork once a doctor has been identified and is available.

Version: 1.0

Milton Ke **University Hospital NHS Foundation Trust** 

This document is uncontrolled once printed. Please check on the Trust's Intranet site for the most up to date version. ©Milton Keynes University Hospital NHS Foundation Trust

- ANNB midwife will bleep the identified doctor/doctors who will provide the signatures on HSA1 form as well as complete consent form, complete HSA4and prescribe medication.
- If none of the doctors from list are available, the matter will be escalated to fetal medicine consultants for further advice.
- If none of the fetal medicine consultants are available, the matter will be escalated to consultant on call. In this situation, the option would be to arrange for the process to be completed on the next available day when a doctor is available.
- The identified doctor will provide signatures on HSA1 form as well as complete consent form, complete HSA4 form and prescribe medications.
- ANNB midwives will complete the checklist (see appendix 3) to ensure that all paperwork is complete, medications are prescribed, communications & and arrangements for admission are made with labour ward (if>16 weeks) & emergency gynae ward (if <=16 weeks).
