## FOI Request: Treatment of inflammatory diseases

Dear Freedom of Information Publication Scheme Co-ordinator,

I am conducting analysis on drugs used to treat inflammatory diseases and kindly request your help.

I would be grateful if you could tell me how many patients were treated by individual drug for Crohn's Disease, ulcerative colitis, plaque psoriasis, psoriatic arthritis, ankylosing spondylitis and rheumatoid arthritis in three months from the start of May 2023 to the end of July 2023 (or the latest available 3 months).

I have provided a grid of drug names and disease names requested in appendix A (below). Please fill in the grid with the numbers of patients (or forward in a format that best suits you) and include data for all hospitals in the organisation (question 1).

If data is unavailable for question 1 it would be helpful if you can provide the information at a department level (question 2).

## Appendix A

Q1 – How many patients were treated with the following drugs for the following diseases in the 3 months between the start of May 2023 and the end of July 2023?

Please use the latest available 3 months if May to July is not available and specify which 3 months has been used. Please ignore any cells which have been blanked out.

We are unable to relate dispensing issues to disease state and have therefore as requested answered question 2.
