

613 - FOI 4956 - Elderly Care

Questions	Comments	FY 2016/17		FY 2017/18	
		Total discharges	Discharged deceased	Total discharges	Discharged Deceased
B) For such wards, where admission rates, over the period April 2017 - March 2018, inclusive, had not, or had only, by common sense standards, slightly decreased, by comparison with the period April 2016 - March 2017, inclusive; please specify how many returned fewer numbers of deaths between April 2017 - March 2018 inclusive, than between April 2016 - March 2017, inclusive.	Included are the total amount of discharges for the wards in question A, and the amount of patients that were discharged with a discharge destination of 'Deceased'. As we do not ring-fence wards specifically for geriatric or elderly patient care, an age clause has been included, so only the discharges of patients aged 75 or over have been included in the data provided.	820	147	1035	155
