

I would like to know in the last 12 months how many people have been brought or attended A&E with injuries consistent with being 'stabbed'.

I would like to know the figure broken down by week.

I would like to know the sex of the individual and their age.

Included are all patients that attended the Trust A & E department between the **1st April 2018** and the **31st March 2019**, with a possible assault with a sharp object or stabbing recorded in the patient records..
