

Request under Freedom of Information Act 2000

Thank you for your request for information which we received on Thursday 8th February 2024 I am pleased to confirm the following.

We are conducting research to determine the causes of sudden cardiac death (SCD) in patients with cardiac devices. Despite an estimated 50,000 to 70,000 annual SCD cases in the UK, post-mortem device checks are not routinely performed, leading to missed insights into the exact causes of these deaths. Our project aims to explore variations in current practices.

Please see attached questionnaire.
